# DESTACLEAN WOOD STONE

**Destaclean® Wood Stone** is an ecological, innovative recycled material. It is used for the production of an increasing number of landscaping products.

Wood stone contains concrete mixed with clean wood fibre from recycled wood, which is used to replace some of the valuable natural stone material. Our wood stone products for yard and regional construction have been tried and tested to withstand loads, wear and weather conditions year-round. Thanks to the wood fibre, they are lighter than conventional concrete products, and that brings benefits in transport and installation. The colour options come from Finnish nature and nicely suit all yard and regional construction. The clean, recycled wood fibre gives the products a beautiful finish with a rustic touch.

The Destaclean® recycling concept has gained widespread attention and received a number of significant awards. We won the community category in the national Productive Idea Competition organised by the Central Chamber of Commerce. The Finnish Association of Landscape Industries awarded Destaclean® Wood Stone with the Green Year medal as named by the Ministry of the Environment.

Destaclean® Wood Stone is an advanced Finnish innovation for a cleaner and better future

# YARD CONSTRUCTION WOOD STONE PRODUCTS

## DESTACLEAN PAVING PRODUCTS 40 mm

### Destaclean patio stone 40 mm

The 40 mm paving stones are ideal for patio areas and pedestrian or bicycle traffic routes, including courtyards, yard routes and barbecue patios. The stones are dyed throughout. The standard colours are grey, black, karelia and sandy brown. Special colours are available on special order.

The ecological, recycled wood fibre gives the patio stones a beautiful and lively finish with a rustic touch, making them perfect for yards and gardens.

(diam./height)  
Weight 135 kg

### **Planter oval**

950 x 500 mm  
(diam./height)  
Weight 180 kg

## WALL BLOCKS

Wall blocks are used for terracing and retaining walls in yards. Even a problematic sloping yard can often be turned into an impressive garden using wall blocks. They can also be used to add life to a flat plot. An elevated planter made of wall blocks is a stylish eye-catcher in the garden.

Destaclean Wood Stone wall blocks will become available in late summer 2017.

**Vallikivi wall block**

PAIR

580 mm x 215 mm x 100 mm, 17 pairs/m<sup>2</sup>

End blocks are also available.

**Lammikivi wall block**
